

WATERGEN

Water. Reinvented.

Creating Drinking Water from Air

Watergen introduces a revolutionary approach to water access through its globally patented Atmospheric Water Generation (AWG) technology. Dedicated to solving the world's water crisis, Watergen provides a completely new and unlimited source of high-quality drinking water—anywhere, anytime. Operating in 90+ countries, Watergen serves governments, industries, corporations, and households, while reducing reliance on bottled water, cutting plastic waste, and eliminating the need for carbon-heavy distribution systems.

Scalable Solutions for Every Sector

Watergen systems serve a wide range of applications, from Homes, offices, factories, hospitals, remote communities, and emergency response services, to automotive and mobility industry, enabling access to fresh drinking water while on the move. Integrated into cars, buses, RVs, trains, heavy-duty vehicles, and marine platforms Watergen's technology is reinventing the future of onboard hydration.

The devices produce

**20 to 6,000 liters
(5.2 to 1,585 gal) per day**

using only a standard electrical connection or renewable energy sources, enabling flexible and scalable deployment worldwide.

Global Reach & Recognition

Creating Drinking Water from Air in 90+ Countries

Manufacturing facilities on three continents:

- North America
- Middle-East
- Asia

Sustainability & Impact

By generating water locally, Watergen:

- Reduces plastic waste and dependence on bottled water
- Eliminates long-distance, carbon-intensive water transport
- Strengthens water security, community resilience, and local economies by creating jobs
- Supports national health and well-being through improved water quality
- Provides an environmentally responsible water solution for a sustainable future

Product Portfolio

Watergen offers a full range of drinking water solutions:

GEN-L

6,000 L / 1,585 gal per day

GEN-M Pro

1,000 L / 265 gal per day

GEN-M1

220 L / 58 gal per day

GENNY+

20 L / 5.2 gal per day

Impact Through Innovation

Access to safe drinking water empowers people to pursue education and work opportunities, reduces healthcare costs, and helps break the cycle of poverty.

Since 2009, Watergen has built a leading multidisciplinary team, established a top-tier research and development center, and partnered with global universities to advance innovation. All efforts serve one mission: providing every individual with access to pure, safe drinking water.

Awards & Recognition

Watergen received multiple international awards for innovative technology and products.

Market-Leading Advantages

Global AWG Leader

Watergen has become the global leader in Atmospheric Water Generation technology (AWG) Creating high-quality drinking water from air—anywhere, anytime—while cutting plastic waste and carbon-intensive supply chains.

Patented Technology

First heat exchanger made from food-grade polymers, producing the purest drinking water from air.

Premium Water Quality

Advanced UV and filtration systems, Unique mineralization formula. Meets EPA, NSF61, Federal Standards, and first AWG compliant with ASSE LEC 2004.

High Efficiency & Output

Up to 5 liters (1.3 gal) per 1 kWh, works in humidity as low as 20%, enabling scalable, sustainable deployment worldwide.

Expert Team

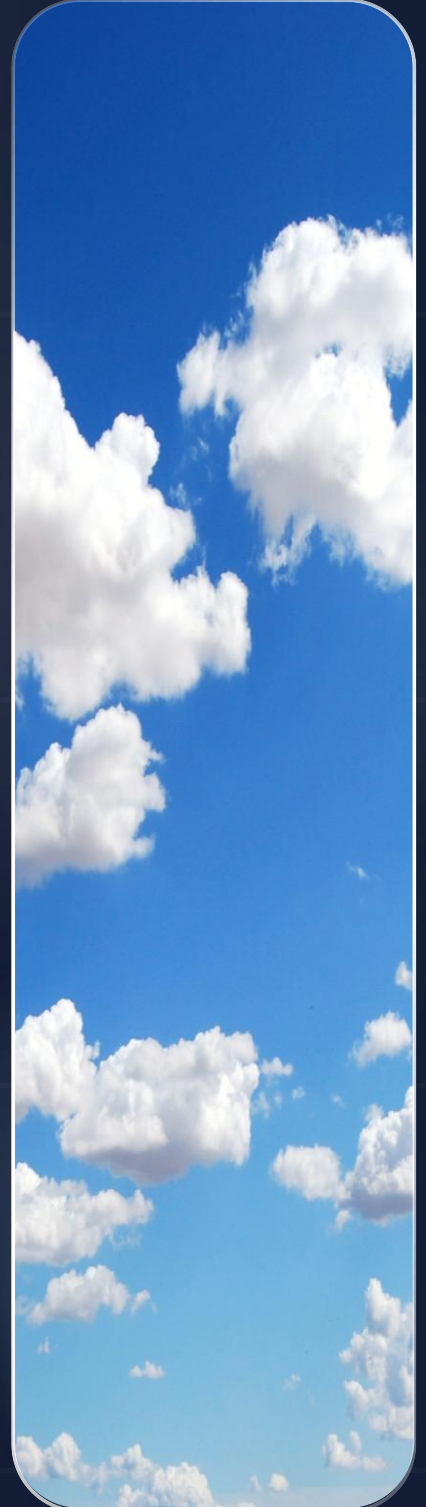

Multidisciplinary team of engineers, scientists, microbiologists, chemists, and designers innovate in-house with state-of-the-art labs, delivering advanced technology and world-class service worldwide.

Global Manufacturing

Facilities worldwide (more coming soon) ensure fast supply, competitive pricing, and local job creation, driving positive impact in every community.

Worldwide Presence & Support

Active in 90+ countries with 24/7 technical support, ensuring reliable customer satisfaction.
